

OZEDI User Pricing

Each account at OZEDI provides for addition of funds online to maintain a positive account balance. Fees are deducted from the account balance over time until exhausted and a top up is required.

Single Touch Payroll Service

Account balance is held in MB purchased in advance. Usage in MB is deducted from the account balance with each upload.

Registration fee (once off per ClientID) \$10+GST
Usage fee \$108+GST per MB

For pricing purposes, OZEDI measures the size of the AS4 messages sent and received from the ATO, **with the payload compressed to minimise message size**. Sample data sizes for payrun uploads are shown below – these have been translated into estimated costs.

Single Touch Payroll	Number of employees									
	10	20	30	40	50	75	100	200	500	1000
MB per payrun	0.030	0.031	0.032	0.033	0.035	0.038	0.041	0.054	0.092	0.155
\$/payrun	\$3.24	\$3.35	\$3.46	\$3.56	\$3.78	\$4.10	\$4.43	\$5.83	\$9.94	\$16.74

For an estimate of costs for more than 1,000 employees, please contact OZEDI.

Access Point Services

OZEDI provides eInvoicing services through our Peppol-certified Access Point. We handle many document types from procurement through to invoicing for multiple countries. This includes Malaysian MyInvois and Singaporean InvoiceNow which is treated as another document for pricing purposes.

Usage Fee \$0.06 + GST per submission

# of documents	\$/document (ex GST)	Discount %
1-500	\$0.06	0.00
501-5,000	\$0.06	20.00
5001+	\$0.06	30.00

Usage fees are deducted at the end of the month when discount is applied to the total number of documents for the month if applicable.

For example, if the total number of documents in a month is 1,000:

1,000 documents at \$0.06 each = \$60.00 (ex GST)
 Less 20% discount (\$60 x 20%) = \$12 (ex GST)
 Amount deducted = \$48.00 (ex GST)

Superannuation Service

OZEDI Superannuation Solution is priced in two components:

- **Usage fee per employee transaction** for processed files. An employee may be counted multiple times in the month if they are included for processing in multiple uploads.
- **Payment service fee** (optional – applies if using our NPP payment service)

Account balance is held in dollars purchased in advance and held ex GST. Usage fees are deducted at the end of the month from the account balance for successful transactions and payments.

Usage Fee \$0.20 per employee transaction

Volume-based discounts will apply according to the number of employee transactions processed each month.

Employees/upload	Fee/employee (ex GST)	Discount%
1-100	\$0.20	0.00
101-250	\$0.20	20.00
251+	\$0.20	30.00

If a client has 30 employees and pays weekly, under Payday Super the calculation is:

- 30 employees x 4 weekly pays = 120 employee transactions per month
- 120 employee records X \$0.20 = \$24.00 per month
- Less 20% volume discount (\$4.80) = \$19.20 per month

Note: File uploads are not charged, including test uploads, error uploads, or those cancelled before processing is completed

Payment Processing fee \$0.25 per successful payment to super fund (not per employee)
 \$0.25 per bank account debit under PayTo Agreement

SBR Direct Connect Service

Account balance is held in number of submissions purchased in advance

Usage Fee \$0.50+GST per submission

Discounts based on block of submissions purchased:

1,000 – 4,999 submissions	20% discount
5,000 – 9,999 submissions	30% discount
10,000+ submissions	50% discount

Maintenance Fee \$1,000 + GST per annum
Support Fee (optional) \$1,000 + GST per annum

Data Security

All documents received at OZEDI are stored encrypted until they have been either forwarded to another Access Point or downloaded by the receiver – at which point they are deleted. OZEDI is ISO 27001 certified and is also compliant with the ASD Essential Eight.

Usage Reporting

OZEDI provides access to view your usage history and available balance. Reporting on usage for each registered under an account company is available online.

Low Account Balance Alerts

OZEDI account holders are notified in advance by email when available account balance is getting low based on an alert level you have set.

Tax Invoices

A tax invoice is generated and accessible online via the account dashboard for download funds are added to the account balance.
